Final Project: Idea Development: Step 1B
3 points: No late submissions; No exceptions[1]
Due Date: May 22, Tuesday, 5:20pm

The objective of this assignment is final project idea approval and facilitation of group formation.

Each student will develop the project proposal individually following structured guidelines described below on *exactly one idea* approved by the instructor[2].

1. A Title for the Project

2. Purpose or objective of the project (in less than 4 or 5 sentences)

3. Provide Data Sources with *appropriate agency names* and clickable web links

At this time, I am expecting 1-3 data sources. This can be enriched further later.

4. Provide Relevant Visualization sources with appropriate titles, agencies, time, and clickable web links

*The closest past project(s) (if any) must be cited under "Visualization Sources"*. In addition, I am expecting 1-3 visualization links. This can also be enriched further later.

5. (optional) Any additional references references to articles or additional information on the project may be added as a separate link in a compact one page (and no more!)

Host the above information on the web using an html/css file and supported via github. In this step, although you can attempt to have compact clutter-free presentation layout, the next step will require elegant presentation layout. In this step, you need to focus only on the contents.

A. You must include your full name as it appears on the class roster; (no nick name please!).[3]

B. You must include an email address that can be used by your classmates to form groups.

C. A weblink stating Gitbub Link which is clickable and takes the user to the github link where your html and css files are located.

Submission on UCSC canvas:
A clickable weblink where the project proposal idea is hosted.

Be prepared to discuss your final project idea in class on May 22.

---

[1] Late submissions will delay group formations and will pull the class backward. If you have not submitted this assignment by due date/time, you are required to meet with the instructor in class on May 22. In addition, late penalty points will be assessed.

[2] If the instructor has not approved your first three proposed ideas by Friday, May 18, 11:59pm, then either you can engage with the instructor via email to attempt to receive an approval for a new idea, but if you run out of time, choose an idea different from the first three proposed ideas and put together a project proposal.

[3] If you forget to provide your name or email address, you will be awarded zero points and will be asked to add this information ASAP during the class on May 22.
